MITSUBISHI	PAJERO/MONTERO	MITSUBISHI	Lancer Evolution

This vehicle was exhibited at the 24th Tokyo Motor Show in 1981. It proposed a new value by combining true off-road performance with the comfort of a passenger car. It featured a compact and square body design, along with a horizontally oriented interior, to maintain functionality. It also adopted Mitsubishi's unique 4WD system, which achieved a balance between off-road capability and maneuverability. In the Dakar Rally, it achieved a total of 12 victories, starting with an overall victory in 1985.

With the goal of winning in the World Rally Championship (WRC), Mitsubishi introduced the lightweight and compact-bodied Lancer equipped with a 2.0L turbo engine and full-time 4WD, as the Evolution model. It continued to evolve over ten generations. Mitsubishi, including the Lancer Evolution and Galant VR-4, achieved a total of 34 victories in the WRC.
